The KaziKidz toolkit is a holistic educational and instructional tool for primary school teachers and arose from the project KaziBantu. Kazi means “active” and Bantu means “people” in Swahili, one of the national languages of South Africa. The lessons have been designed in conjunction with South Africa’s Curriculum and Assessment Policy Statement (CAPS). Ready-to-use assessments can be found at the end of each section which may be integrated into formal assessments of learner performance and can supplement the school academic curricula. The aim is to lead learners through content, games and activities, and conducted in a joyful manner that encourages and promotes a healthy lifestyle throughout childhood into adolescence. By using KaziKidz you will be contributing to the wellbeing and health of your learners.

The “Moving-to-music” lessons are designed to support teachers to develop personal, physical and psychological skills through dance and movement experiences. With the ready-made lessons, teachers are empowered to teach dance and conduct dance lessons in a school setting. Each lesson has direct instructions that can be read or translated directly to the learners. Teachers do not require any prior knowledge or training in dance. Where teachers are absent, community members or learners will be able to read these instructions and facilitate a meaningful dance experience.

The duration of each lesson is 40 minutes and is split into three parts. In the introduction of each lesson you will find what accompaniment you require for the execution of the dancing lesson. You can choose between using a drummer (you can drum yourself, ask a community member or ask a different learner to drum for each lesson), choose or play your own songs, or download the specific music that accompanies this toolkit. You can also choose to do the activities without any accompaniment. There will always be different options to include music, rhythm or movement without music for each lesson. Each lesson starts with a warm-up and/or cardio activity. The warm-up aims at limbering up joints and muscles before interacting in jumping, spins and dancing movements. Furthermore, the goal is to increase the heart rate and fitness by playful games. The warm-up is followed by an introduction to the specific lesson focus.
The main section contains exploring new movements or concepts, musical songs and creative individual and group activities. The action-song-lessons contain instructions to facilitate the basic steps in the form of a song. Creative-dance-lessons focus on each learner’s own way of moving, as learners are encouraged to explore new ways of moving through specific prompts and creative collaborative work. Both types of lessons include activities that among other things teach expressive and explorative movement, interpretation of rhythm and music, improvisation and body awareness. Learners are able to explore the elements of movement such as space, direction, rhythms and sensory awareness. Each lesson closes with a cool-down section in order to calm the learners and prepare them for further school work. The cool-down can maintain presentations of creative group activities, stretching and relaxation of body and mind.

Now, we wish you a lot of fun with the implementation of the KaziKidz teaching material and many great experiences with your schoolchildren.
